

we imagine designs...

“

TC Architecture & Design Studio is an Istanbul-based multi-disciplinary design and consultancy firm that expertly crafts industrial solutions, lifestyle products and bespoke environments for both commercial and residential spaces.

”

we produce solutions...

Artelligence is the studio's defining approach to balancing aesthetic judgement with functional intelligence. It brings artistic intent, technical requirements and the realities of production together within a single design process.

Tanıl Çokşenim graduated from Mimar Sinan University with a degree in Architecture and later completed a master's degree in Business Administration.

His architectural education, business perspective and professional experience enable him to understand each client's priorities and constraints and translate them into clear, project-specific responses.

His work treats spaces and objects as integral parts of everyday life, shaped to serve their purpose, respond thoughtfully to their context and evolve through their relationship with users. For the studio, timelessness lies in this capacity to acquire new layers of meaning over time.

Tanıl Çokşenim
Founder / Architect / Designer

TC Architecture & Design Studio is built on the experience of its founder, Tanıl Çokşenim, whose professional practice spans more than two decades. The studio brings together architectural thinking, technical precision and production knowledge to develop functional, sustainable and cost-conscious solutions for residential, commercial and industrial projects. Artelligence defines this multidisciplinary approach, balancing aesthetic intent with functional intelligence and the specific requirements of each project.

Alongside architecture and interior design, the studio has extensive experience in industrial production and exhibition applications. Its work ranges from project development and custom-engineered production to consultancy for exhibition stands, point-of-purchase systems and façade solutions. This experience allows design decisions to be considered together with production methods, budget and implementation requirements from the outset.

Furniture and accessory design forms a continuous part of the studio's practice alongside architecture and interiors. Since 2014, the studio has presented its own collection at a number of design fairs, bringing together architectural thinking, material knowledge and industrial production techniques.

This experience also informs the studio's product development and consultancy work, from initial design concepts and prototyping through to production-ready design.

Human-Centered Engineering

Spaces and objects should respond to the human body, not ask the body to adapt to them. Every dimension is treated as a design decision—from the depth of a sofa to the height of a work surface—and is carefully developed around the user, the activity and the specific conditions of each project.

The Balance of Artelligence

Art and intelligence are not treated as opposing forces. The studio works between the emotional character of a space and the technical systems that support it. Smart-home scenarios and circadian lighting principles are incorporated where appropriate, allowing performance and atmosphere to be developed as one.

Minimalism with Technical Depth

Minimalism is understood not as the removal of detail, but as the careful resolution of it. The studio maintains close technical control from concept through implementation, so the built outcome remains as close as possible to the original design intent. Design becomes a disciplined form of concentration—a process of reducing complexity to clear, functional order.

Architectural Design

Concept Design

Establishing the core idea, spatial organization and design language of the project.

Design Development

Developing the spatial, material and technical decisions required to resolve the concept.

Construction Documentation

Preparing the drawings and details required for accurate on-site execution.

Site & Discipline Coordination

Coordinating the relevant disciplines to support a consistent implementation process.

Interior Design

Spatial Concept & Planning

Defining spatial identity through planning, atmosphere and user experience.

Material & Color Strategy

Selecting materials, textures and colors that define and support the space.

Visualization & Design Development

Developing and communicating design decisions before implementation.

Furniture, Detail & Production Drawings

Designing fixed and loose furniture and preparing the technical details required for production.

Product Design

Product Concept & Research

Developing product ideas around user needs, context and production criteria.

Industrial Design & Prototyping

Resolving aesthetics, ergonomics and manufacturability through design development and testing.

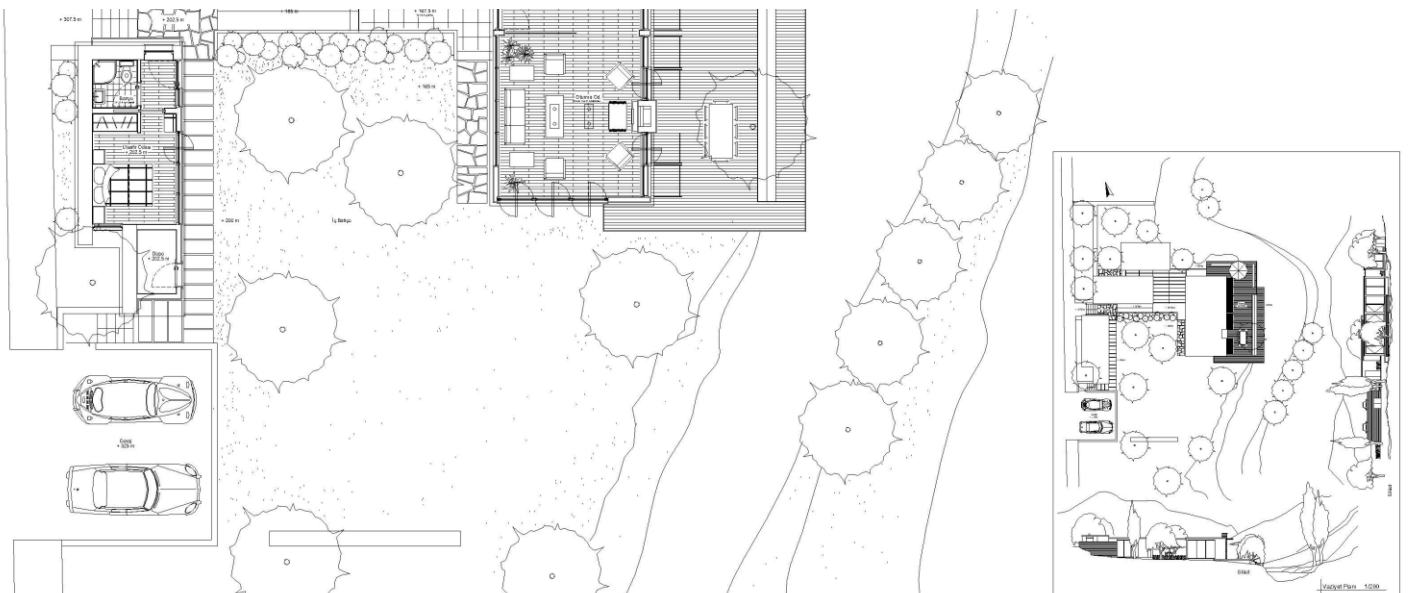

Production Development

Supporting the transition from prototype to production-ready design.

Brand Integration

Aligning the product with the brand's identity and positioning.

Depending on the project scope, the studio's involvement may also include lighting design, FF&E selection, exhibition design, fit-out and site management, and cost analysis and budget management. Architectural project development and permit documentation are undertaken selectively, in response to project requirements and local approval processes.

Scope of Services

Design

Development and management of the entire design process from concept to realization.

Product Concept & Research

Development of product ideas based on user needs and market insights.

Execution

On-site implementation ensuring quality, accuracy and timely delivery.

Supervision & Control

Monitoring the execution process and ensuring compliance with design intent and quality standards.

Consultancy

Professional guidance on project development, material selection, cost optimization and design strategies.

Process Approach

Analysis

A comprehensive evaluation of project requirements, user needs and spatial data.

The context, budget and technical constraints are defined to establish a clear problem framework.

Concept

Development of the core idea, spatial organization and design language based on insights gathered.

The balance between function, aesthetics and experience is defined at this stage.

Development

Refinement of the concept through technical, structural and detailed design decisions.

Material selections, system definitions and execution-ready documentation are prepared.

Execution

Implementation of the design on site in coordination with all disciplines. Time, quality and budget are actively managed throughout the process.

Control

Supervision of the execution to ensure alignment with design intent. Quality assurance and necessary adjustments are carried out.

Each phase is treated as a continuation of the previous, forming a seamless and integrated process. This approach ensures that design decisions are accurately translated into the built outcome.

selected works...

Project Type: Residential

Scope of Services: Concept Design
Interior DesignProject
Fit-out & Site Management,
Furniture, Fixtures & Equipment (FF&E) Selection,
Lighting Design,
Cost Analysis & Budget Management

Location: Zorlu Residance, Levazım, ISTANBUL

Year of Completion: 2020 – 2021

Total Floor Area: 704,2 m²

Project Type: Commercial

Scope of Services: Concept Design
Interior Design Project
Furniture, Fixtures & Equipment (FF&E) Selection,
Lighting Design,

Location: Şehitkamil, GAZIANTEP

Year of Completion: 2024 - 2025

Total Floor Area: 1.512,5 m²

Project Type: Commercial

Scope of Services: Concept Design
Interior Design Project
Furniture, Fixtures & Equipment (FF&E) Selection,
Lighting Design,

Location: Tüyap Fair & Convention Center, ISTANBUL

Year of Completion: 2024 - 2025

Total Floor Area: 285 m²

Project Type: Residential

Scope of Services: Concept Design
Interior Design Project
Fit-out & Site Management,
Furniture, Fixtures & Equipment (FF&E) Selection,
Lighting Design,
Cost Analysis & Budget Management

Location: Raffles Residence, Levazım, ISTANBUL

Year of Completion: 2025 – 2026

Total Floor Area: 363,0 m²

RESIDENCES

EH HOUSE / 2020 - 2021 / 704,2m² / Turnkey Interior Design & Implementation
Zorlu Residence, LEVAZIM, ISTANBUL

OH HOUSE / 2020 - 2021 / 194,4m² / Turnkey Interior Design & Implementation
42 Maslak Residence, MASLAK, ISTANBUL

MK HOUSE / 2020 - 2021 / 191,9m² / Turnkey Interior/Enviroment Design & Implementation
Private Villa, BEBEK, ISTANBUL

ÇEH HOUSE / 2021 - 2022 / 286,5m² / Turnkey Interior Design & Implementation
Zorlu Residence, LEVAZIM, ISTANBUL

KEH HOUSE / 2022 - 2022 / 171,4m² / Turnkey Interior Design & Implementation
Zorlu Residence, LEVAZIM, ISTANBUL

ÇH HOUSE / 2023 - 2024 / 414,5m² / Turnkey Interior/Enviroment Design & Implementation
Nidapark Istinye Panorama, ISTINYE, ISTANBUL

KH HOUSE / 2025 - 2026 / 363,0m² / Turnkey Interior Design & Implementation
Raffles Hotel Residence, LEVAZIM, ISTANBUL

LODA FURNITURE STORES

BOSTANCI / 2022 - 2023 / 1.529,7m² / Turnkey Interior/Facade Design & Consulting
Building, BOSTANCI, ISTANBUL

SKYLAND HOM / 2023 - 2023 / 552,4m² / Turnkey Interior Design & Implementation
Skyland Hom Mall, SARIYER, ISTANBUL

MASKO / 2023 - 2024 / 674,6m² / Turnkey Interior Design & Consulting
Masko, IKITELLI, ISTANBUL

MODOKO / 2024 - 2024 / 640,5m² / Turnkey Interior Design & Consulting
Modoko, UMRANIYE, ISTANBUL

GAZIANTEP / 2024 - 2025 / 1.512,5m² / Turnkey Interior Design & Consulting
Osman Gazi, SEHITKAMIL, GAZIANTEP

OFFICES & MORE

KS DIS KLINIGI / 2019 - 2020 / 168,4m² / Turnkey Interior Design & Implementation
Cemil Topuzlu, CIFTEHAVUZLAR, ISTANBUL

TEKNOSER STORE / 2022 - 2022 / 245,1m² / Interior Design & Consulting
Nef09, KAGITHANE, ISTANBUL

TEKNOSER STORE / 2022 - 2022 / 256,8m² / Interior Design & Consulting
Metrocity, BESIKTAS, ISTANBUL

ENESCO OFFICE / 2022 - 2023 / 226,9m² / Interior Design & Consulting
IstMarina, KARTAL, ISTANBUL

EC DIS KLINIGI / 2022 - 2023 / 162,4m² / Turnkey Interior Design & Implementation
Bağdat, CADDEBOSTAN, ISTANBUL

LODA FAIR STAND / 2023 - 2023 / 285,0m² / Turnkey Interior Design & Consulting
Tüyap Fair & Convention Center, BUYUKCEKMECE, ISTANBUL

LODA FAIR STAND / 2025 - 2025 / 285,0m² / Turnkey Interior Design & Consulting
Tüyap Fair & Convention Center, BUYUKCEKMECE, ISTANBUL

**INDUSTRIAL DESIGN
CONSULTING**

LODA FURNITURE / 2022 - 2025 / Consulting

Brand's corporate identity, public relations, furniture collection and branding

LODA FURNITURE / 2022 - on going / Industrial Design, Prototyping,
100+ furniture design, prototype, get ready to market

ZIVELLA FURNITURE / 2022 - 2023 / Industrial Design, Prototyping,
5+ furniture design, prototype, get ready to market

design is the pursuit of a better life...

Selected brands and organizations designed for across Tanil Çokşenim's professional practice and the studio's work.

TC Architecture & Design Studio brings architectural and industrial design capabilities together for projects that require coordination across disciplines from the earliest stages. Its experience extends from feasibility studies and master plans through detailed design for corporate, retail, institutional and individual clients.

Principal-level involvement remains central to the studio's way of working, enabling project needs, schedules and budgets to be addressed directly throughout the process.
